

Jaspal Kaur Public School Save Soil Campaign

Soil is a combination of minerals, organic matter, air, water and living organisms. We need it to sustain life. But we have taken soil for granted and now about one-third of the world's arable soils are degraded. To deal with this alarming situation, JKPS has joined hands with Isha Foundation and participated in Save Soil Campaign.

Save soil is a global movement launched by Indian spiritual leader Sadhguru to invoke a conscious approach to saving soil and the planet in all. Students from Preschool to X participated enthusiastically in this campaign. They expressed their views by writing letters to the Honorable Prime Minister and urge him to make a policy to save soil.

Further, all the letters were handed over to Ms Roma, a volunteer associated with Isha Foundation. All these request letters will be sent to the Prime Minister by Isha Foundation so that a soil rejuvenation policy can be initiated by our government.
