

JASPAL KAUR PUBLIC SCHOOL

ANTI CRACKER DRIVE

To create awareness about the harmful effects of crackers, the Eco club of Jaspal Kaur Public School organized an Anti-Cracker Drive on 25 October 2024. The initiative aimed to educate students about the environmental and health hazards caused by the excessive use of firecrackers during celebrations, particularly during festivals like Diwali.

The day began with an awareness drive in the school premises in which the eco club members visited various classes and explained to students about the negative impact of crackers on air quality, noise levels, and the well-being of animals. This was followed by a rally in the neighborhood area in which the students carried the placards and spread awareness among the local community.

The event was a resounding success and instilled a sense of responsibility among the students towards protecting the environment.
