Workshop on IPM as a Career Option

At JKPS, we believe in shaping the leaders of tomorrow. To facilitate this vision, a session was organised on 16 May 2024 by the school where Mr. Deepak Kushwaha, the co-founder of the highly successful startup, IPM Careers introduced the Integrated Program of Management (IPM) as a career option to students.

Through an interactive session, the speaker equipped the students of grades XI & XII with the knowledge and skills necessary to embark on a successful journey in management. The session provided invaluable insights into the program, its application process, examination pattern, syllabus, and schedule.

By participating, students gained access to a wealth of information and guidance from experienced speakers. The workshop ended with an engaging question-and-answer session where students asked questions and got more clarity on the topic.
