Report on Course: Empowering Teachers with Artificial Intelligence (AI)

A professional development course titled **"Empowering Teachers with Artificial Intelligence (AI)"** was successfully attended by **Ms. Prabhjot Kaur Bedi (PGT Computer Science)** on **22nd October 2025**. The online course was successfully completed through the DIKSHA platform and administered by CIET, NCERT. The training comprised 5 hours of focused instruction, offering participants significant insights into foundational and modern aspects of artificial intelligence relevant to teaching. The curriculum covered a range of topics such as definitions, the evolution and history of AI, and its types, including Generative AI, with a special emphasis on the ethical and practical integration of AI technology in classroom settings. Participants learned about leading AI tools like Perplexity, DALL-E, and Classroom Screen and explored their classroom applications aimed at enhancing digital pedagogy and fostering interactive learning. This achievement strengthens the ability to incorporate innovative AI-driven practices in the school environment, supporting high standards in digital education and equipping teachers to create more inclusive, engaging, and future-ready classrooms. The course focused on enhancing teachers' understanding of Artificial Intelligence and its integration in the field of education. It emphasized practical strategies to leverage AI tools for improving classroom engagement, personalizing learning experiences, and fostering digital readiness among educators. Through this training, Ms. Prabhjot Kaur Bedi gained insights into innovative teaching methodologies, responsible AI usage, and the potential of emerging technologies to transform education. A **certificate of participation** was awarded in recognition of her successful completion of the program.
