

PSYCHOMETRIC TEST

A career orientation session was organized for parents and students of classes X-XII to orient and familiarize them with various career prospects. To take it further, the school facilitated a psychometric assessment with Jitin Chawla's Centre for Career Development, India's Largest Career Counselling firm, active in career counseling and workshops. In order to make an informed decision, an understanding of the individual is required. One needs to understand his/her personality, interests, and aptitude before making a career choice. Keeping the need for counseling in mind, the school arranged for psychometric testing for class X on December 2, 2022. Individual counseling was also undertaken in school wherein discussions with parents and the child were held & therefore the child's stream & career pathway were finalized. The counseling was done with Jitin Chawla's team of senior counselors.
