

14<sup>th</sup> December

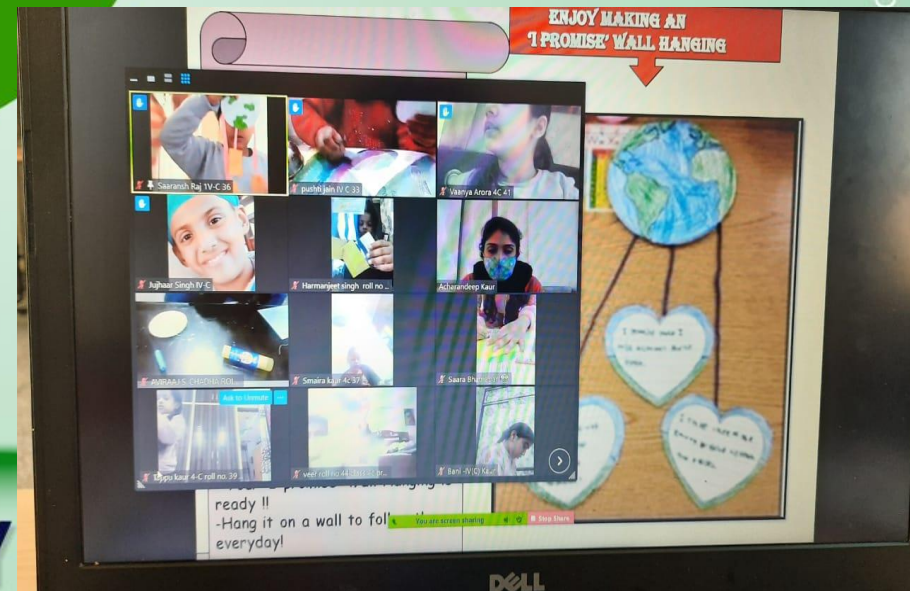

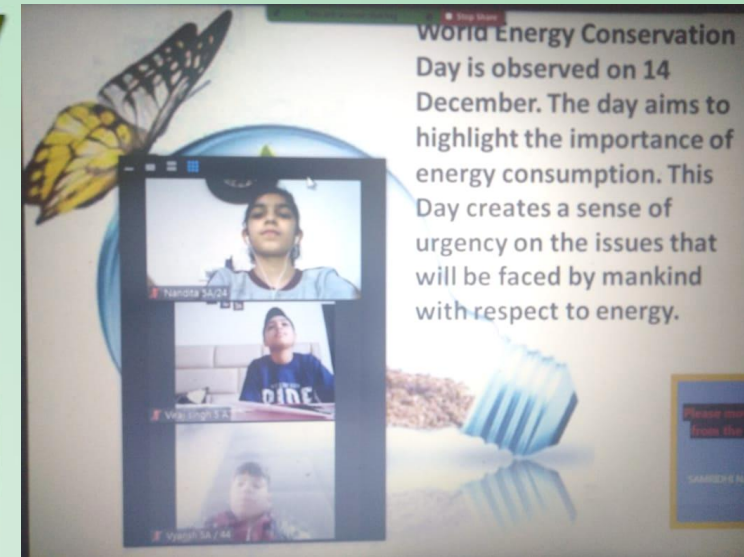

# WORLD ENERGY CONSERVATION DAY

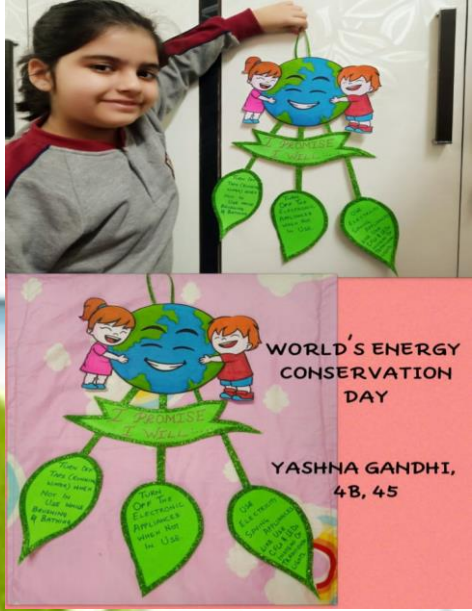

World Energy Conservation Day is observed on December 14 every year. It focuses on creating awareness in people regarding the importance of energy conservation and ways to achieve it to deal with the crisis of climate change and global warming. The day aims at spreading awareness among people to conserve natural resources like petroleum and coal for the future generation. Students of classes IV & V were shown a PPT and videos which emphasized conserving non-renewable resources of energy. They also made beautiful 'I Promise' wall hangings in which they wrote how they would contribute to saving energy and took a pledge to follow them.

**SAVE TODAY  
SURVIVE TOMORROW**

# Happy Energy day Save Earth and Save Energy

## Best Wishes from Kirti
